Durability

The Last Shelving You'll Ever Need

Our superior Camshelving® products

will deliver not only reliable and robust storage but will also achieve longevity (20+ years at many operations) that won't be compromised by the roughest handling, environment, or storage needs. Our high-quality materials and anti-rust, anti-corrosion construction, even in humid environments, means you will experience storage like never before.

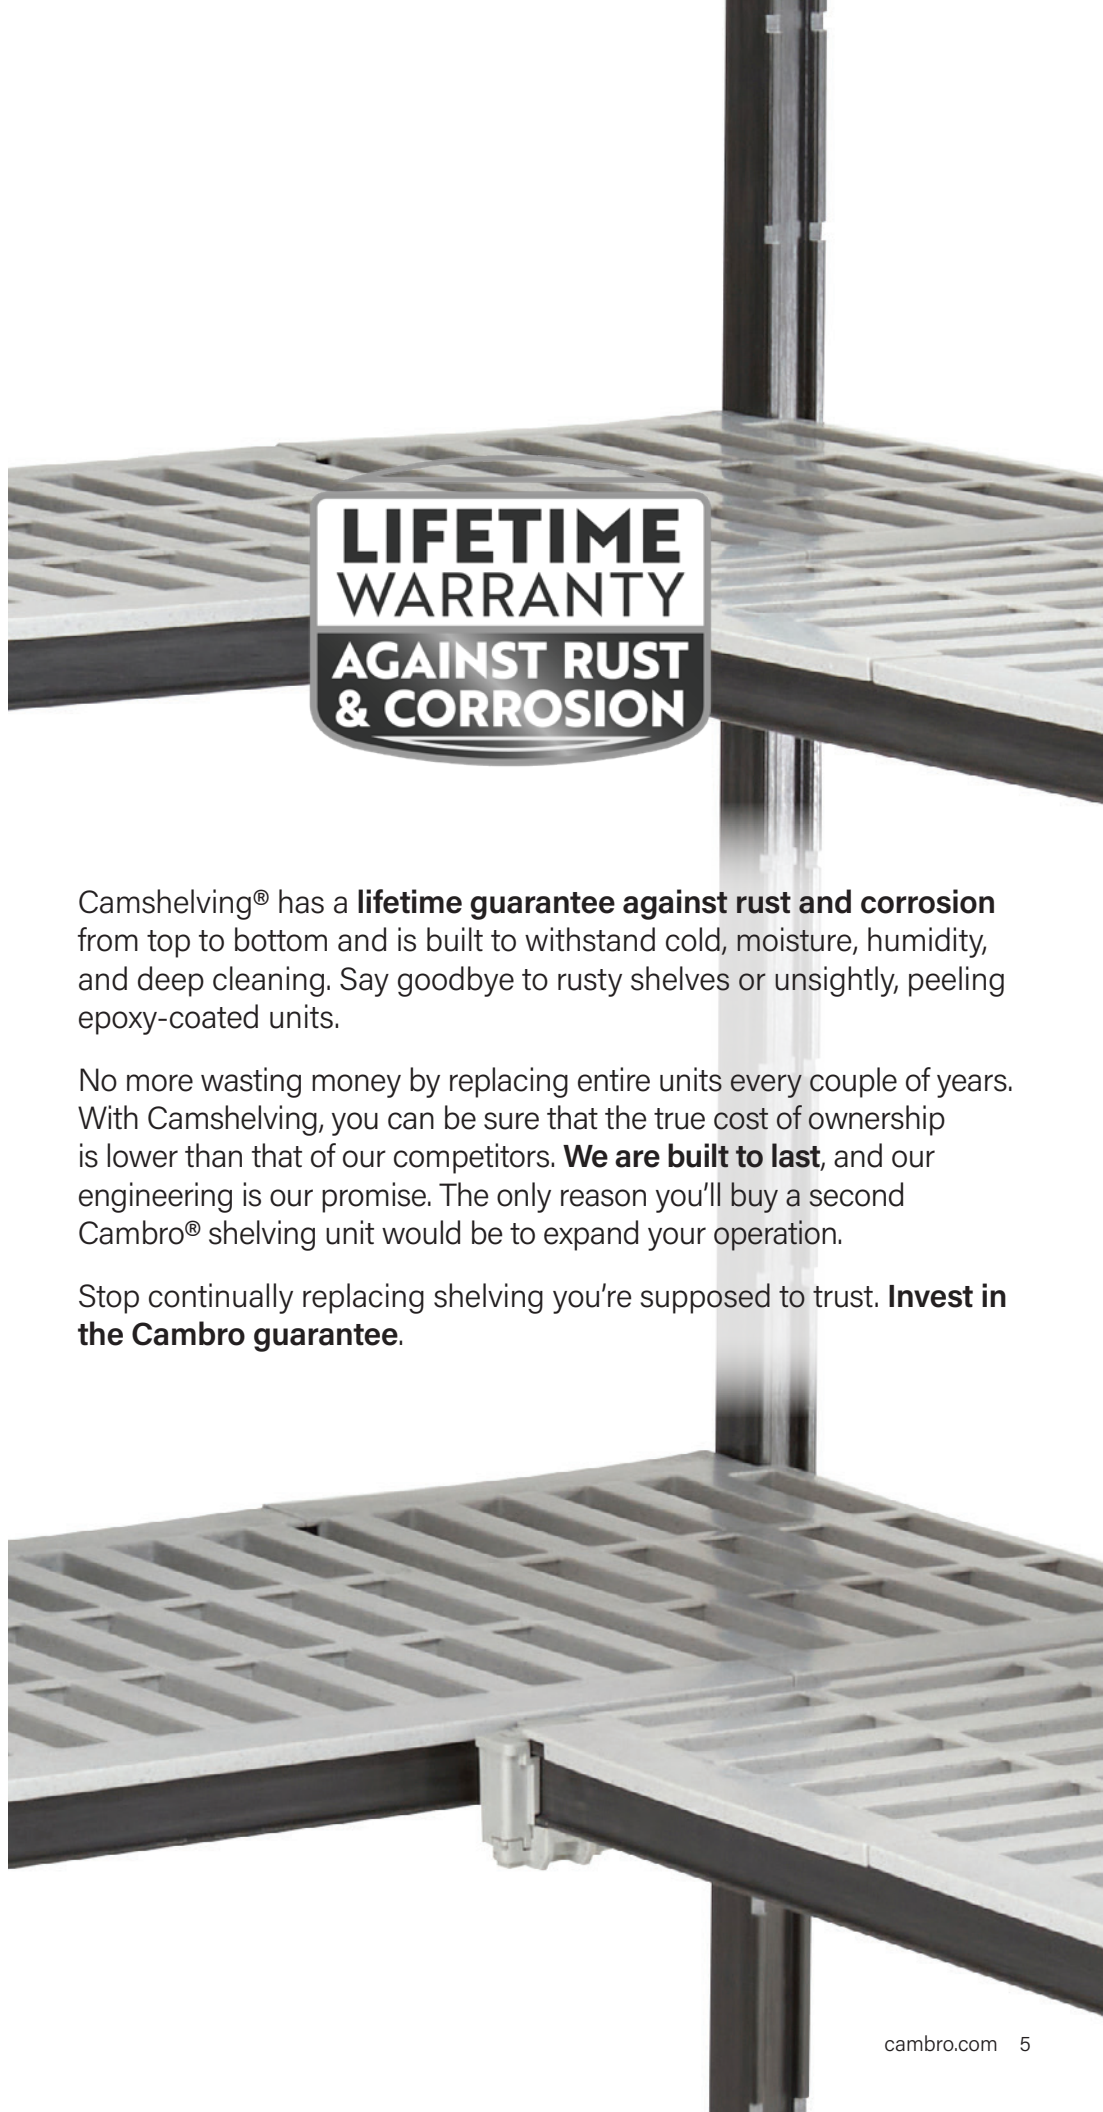

LIFETIME WARRANTY AGAINST RUST & CORROSION

Camshelving® has a **lifetime guarantee against rust and corrosion** from top to bottom and is built to withstand cold, moisture, humidity, and deep cleaning. Say goodbye to rusty shelves or unsightly, peeling epoxy-coated units.

No more wasting money by replacing entire units every couple of years. With Camshelving, you can be sure that the true cost of ownership is lower than that of our competitors. **We are built to last**, and our engineering is our promise. The only reason you'll buy a second Cambro® shelving unit would be to expand your operation.

Stop continually replacing shelving you're supposed to trust. **Invest in the Cambro guarantee.**

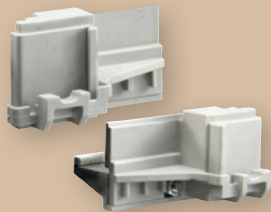

Modularity

The Right Shelf for Your Operation, *Always.*

Camshelving® is designed to grow with you.

As your operational needs change, you can add and adjust shelf components, including entire shelves, accessories, or add-on units. The fully modular Camshelving units enable you to create the storage experience that is right for you.

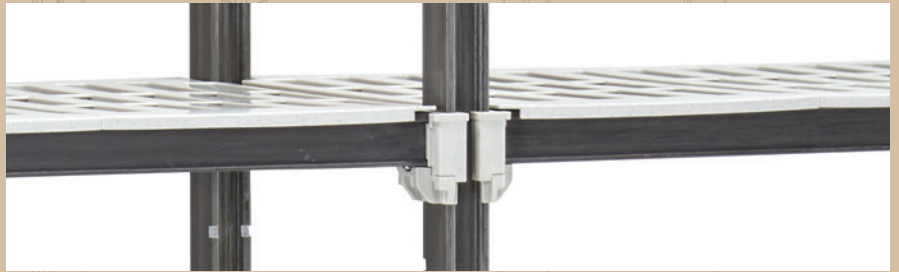

Our patented **Corner Connectors** help create wide-open corners in L-, T-, and U-shaped units, removing blind spots and out-of-reach areas. When your inventory is easily visible, you minimize food waste, mitigate potential food safety risks, and speed up day-to-day operations.

The **shared post design** redefines shelving flexibility, eliminating space loss without compromising on strength and weight bearing. Share posts across multiple units and gain up to **1.75" of usable storage** space in a continuous line.

Accommodate different product sizes with ease by placing individual shelves at varying levels.

We craft every component to ensure you can trust that your shelving won't buckle under pressure. From reliable Cambro®-made casters that enhance ease of movement, to dunnage stands that increase weight-bearing capacity on the bottom shelf by 30%, we address every critical point to provide **stability you can trust**.

Storage Efficiency

Make All of Your Space Work as Hard as You Do.

We know kitchens are shrinking

and limited storage can feel like it's closing in on you. Our thoughtfully designed Camshelving® components will completely transform how you perceive storage capacity, unlocking accessible storage space anywhere in your operation.

The team at Cambro® is ready to show you how Camshelving® works for you.

Cleanability

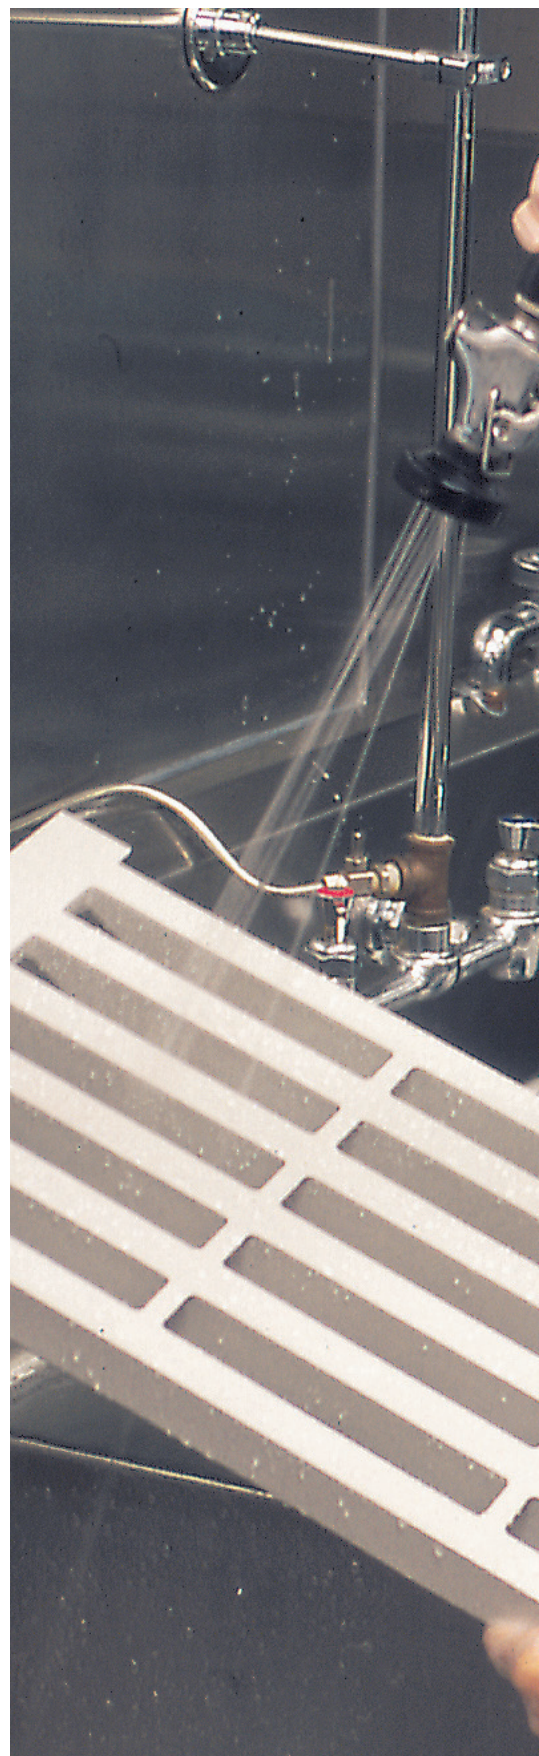

A Cleaner Shelf Means a Safer Kitchen.

Cleanliness isn't optional, it's critical. Camshelving® is engineered to make exceptional hygiene fast, simple, and non-disruptive for any operation. Camshelving is designed to never rust or corrode, from top to bottom, eliminating grime traps and sanitation challenges.

Drying and Storage Rack Units

Smart solutions for efficient and hygienic drying of various prep, meal delivery, or storage containers, enhancing safety and workflow.

Cambro's Lifetime Warranty against rust and corrosion from top to bottom keeps your shelving hygienic and food-safe, even in the toughest environments. Additionally, accessories, like the Camshelving® Drying Rack, promote improved airflow for faster, more sanitary equipment drying, reducing moisture build-up and the risk of bacteria. Keep food safety your top priority throughout your operation.

Fully removable, dishwasher-safe components make daily and deep cleaning quick and easy, without interrupting operations. Shelf plates, traverses, and accessories can be detached without taking apart the entire unit, so you can clean hard-to-reach places quickly and thoroughly.

Built-in Camguard® antimicrobial protection on every shelf plate provides an extra layer of defense by inhibiting the growth of bacteria. Unlike wire shelving that produces metal shavings and can trap grime, Camshelving with Camguard prevents odor-generating bacteria, stains, and debris from contaminating your ingredients.

Premium® Series

STATIONARY • MOBILE • HIGH DENSITY TRACK SYSTEM

The original Camshelving® has delivered unmatched product excellence and performance in kitchens around the world. With steel core posts and shelf traverses, it is solidly stable in any environment. Plus, with sleek, plastic molded-in components, it's still the fastest and easiest shelving to assemble and adjust, even by one person.

STATIONARY • MOBILE • HIGH DENSITY TRACK SYSTEMS • UNDERCOUNTER

The Camshelving® Elements XTRA Series is the enhanced version of our original Elements composite shelving. Reengineered with fewer components, assembly is easier than ever. The new heavy-duty corner connectors allow for maximizing storage capacity with no loss of weight-bearing in any configuration. With universal posts and shelves, you can easily adjust units from stationary to mobile to meet your needs. This series encapsulates a thoughtful evolution, enhancing practicality while maintaining trusted performance.

High Density Floor Track

Camshelving® High Density Shelving Systems offer an excellent alternative to traditional shelving. Designed to expand the usable space in limited storage areas, these systems allow operators to maximize efficiency without compromising accessibility. Top-mounted or floor track systems, compatible with our Camshelving accessories, give operators the flexibility to design their unit without compromise. Simple to install anywhere, including coolers and freezers.

Universal Storage Rack Kits

A versatile and totally unique add-on solution, this rack transforms stacked pans and gaps of wasted space into easy-to-access, vertical storage for food boxes, pans, and sheet pans, optimizing access for increased efficiency and First-in, First-out (FIFO).

Unique Products

for Maximizing Handling & Storage

& Accessories

Camshelving® Wine Rack Units

A high-performance alternative to wire, metal, and wood racks, our wine racks are ideal anywhere you want a sanitary, well-organized, and reliable bulk storage system.

Can Rack Units and Kits

Front-loading FIFO storage offers super-compact, easy-access inventory management of #10 and #5 cans. Durable material helps reduce can denting associated with rigid metal storage systems.

Accessorize to Maximize

Single Shelf Sheet Pan Rack

Easily installs on shelves, freeing up space on mobile speed racks.

Straight or Angled Divider Bars

Create prep or service stations for food pans or food boxes.

ID Tags

Clips easily onto traverses, ensuring everything is in its place.

Dunnage Racks

Heavy-duty and highly durable, ideal for storing frozen, fresh, or non-perishable products safely off the floor in any environment.

Pegboard Storage System

Eliminate unsanitary storage and free up valuable shelf space with a one-stop solution.

Divider Panels

Separate and organize small items on shelves.

Shelf Rails

Prevent contents from falling off shelves with side-to-side, end-to-end protection.

Single Shelf Security Cage

Create instant secure storage, shelf by shelf, wherever needed.

Full Security Cage or Full Unit

When securing contents is required all the way around.
